

RANCH GEAR

Necessity is the mother of invention, and here are some cool inventions that will make watering your herd, feeding your herd, fencing in your herd and walking out to check your herd a whole lot easier!

NO MORE SLIPPING ON SNOW OR ICE!

Reduce slip-and-fall accidents outside your home with HeatTrak's heated stair mat system. The electrically heated mat is designed to prevent snow and ice accumulation on stairs. The HeatTrak® mat plugs into a 120V outlet generating heat to melt snow at a rate of 2" per hour. Durable, designed to be left outside for the winter. Power plug sold separately.

FROSTFREE NOSEPUMP

This award-winning waterer includes a small, enclosed trough with a lever apparatus that is pushed by the animals (cows, horses or bison) nose. The nose-powered lever apparatus operates a piston pump which is suspended in the well - much like the old hand pumps. With provision for frost protection the pumps work trouble and energy free. \$1195 CAD

PVM AUTOMATIC GATE CLOSER

Open the gate with a gentle bump from the front tire of your chore tractor or with a quick snap by hand. Gate closes quickly and self latches. Gate is adjustable for wind conditions and safety. The latch and gate spring pressure can be adjusted up or down, for more or less pressure. Just chain up the gate at the end of your chores! No electrical or solar power required. \$379 CAD
